

Keyfort™ PROTEL MANAGED SERVICE

The ProTel Managed Service provided by Keyfort gives you the control, support and security needed for home working. The service comprises the following:

- Up to 8mb* download, static IP and 10Gb monthly bandwidth broadband. Existing ADSL circuits can be migrated to the service and upgraded.
- Installation coordination including circuit migration as required, all the logistics are taken care of by Keyfort.
- Firewall/router to protect the local area network (LAN).
- Up to two secure virtual private network (VPN) links to office networks, allowing you to share data with those in the office.
- Four port switch allowing up to four computers to be directly connected to the firewall/router and to share the ADSL broadband link.
- 8X5 technical support desk with experienced engineers proactively managing and supporting the ADSL and firewall. So if things go wrong, a single point of contact is available which will provide you with an experienced ICT engineer at the end of the phone to get you back up and on-line.
- Consolidated billing for multiple teleworkers to minimise administration overheads for the central office.
- Optional PSTN line co-ordination with reduced line rental.

Additional Services:

- Optional web space and mail boxes.
- Domain registration and management.
- The firewall/router provides for optional wireless connections, making connections around the home far simpler with no wiring required.
- Optional annual content filtering license.
- Optional annual anti-virus license.
- ADSL usage reporting, informing you on how your internet connection is being used.
